

AnyMerge is providing a truly needed service to our school. With the addition of Google Education and cloud-based services, having the ability to enhance our documents through the Google apps is a great advantage. With [AnyMerge](#) we have that enhancement.

Many of our teachers where use to merging information using Microsoft Word and were frustrated when they tried to merge information using Google Docs. AnyMerge solved this problem and with their commitment to education, they give us access to these tools for free.

I would highly recommend the [AnyMerge Add-Ons](#).
